The Buda and Bryan lode claims.

RAYMOND'S NEW HOIST.

J. C. Sullivan In the City to Order the Machinery.

spirits in the Raymond mine of the Tinite district, was in the city yesterday arranging with a local machinery house for a new steam hoist, air compressors and drills, which will be installed on the property as soon as the equipment can be gent out. The machinery will be the most modern to be found in the market, and will be capable for doing deep sinking.

The shaft will be run down to the 700 level. A road is being built from Eureka to the mine and grading for the new holst is also under way.

Up a Bingham Proposition.

whose outsiness alone brings them it contact with the merchants and business men, have very acte, if any, idea of how wonderfully this town is growing, and how it is fast becoming a place of attractive and comfortable homes. The main street is gradually being extended east, and the character of buildings in course of erection is pretty in design, and substantial. Patrick Shea, one of Eureka's solid men, has built a roomy, well appointed store for Messra. Heffernan and Thompson, and Attorney B. N. C. Stott is just completing a stone and brick building soon to be occupied by Druglet M. D. Howlett. It makes a valuable and attractive acquisition to the main thoroughfare.

have attracted the Herald correspondent's attention are the cottages of J. W. Merrill, Joseph Fryer, John Diamond, Jacob Sayder, R. W. Bail, John Daiey, Michael O'Neil, John Taylor, David Beck, John Shea, Daniel Handler, John Hughts and John Pope. Nothing so thoroughly demonstrates that a man may be regarded as an all-around, desirable, good citizen as his home. It indicates his love for his family and his admiration for and confidence in his home town. The schools of Eureka are a source of comfort and pride to the heads of every family.

SEVIER DEAL OFF.

Parties Cannot Agree On Price and

The deal that has been pending between Mr. Lammersdorf and John Dern and others for a large block of the stock of the Sevier mine, now owned by Mr. Lammersdorf, has been declared off for the present. Mr. Dern and his associates are not willing to pay the price the owner wants for the stock. They have an excellent opinion of the property and believe the Sevier has the making of a fine proposition, yet they cannot agree with Mr. Lammersdorf on the value of the mine.

DIXIE COPPER GROUP.

History of Discovery and Development of This Property. St. George, Utah, July 2. To the Editor, Salt Lake Herald:

Dear Sir—Having read in the issue of June 25 of your valuable paper the article entitled "Dixte Copper Sale." I consider it my duty to request you to make a few corrections, as it centains some errors concerning the history of the Dixte Mining & Smelling company. All that has been said concerning the value of the mines is, in the opinion of the writer, perfectly true. There is no doubt that the present and prospective value is wonderful, and that development will surely make the property one of the greatest copper producers in the state of Utah. In giving the history of these famous mines, an injustice has been done, though not intentionally, in that the name of the Hon. John Pymm is one of the ploneers of St. George. He has filled the position of assistant postnasster and postmaster for thirty-seven years, and is the present incumbent of the office. This makes him the idest postmaster in the state. Mr. Pymm is M years of age, and is still in possession of good health and mental vigor. His life has been replete with good acts. Always practicing charity, and every rendy to advocate measures that tend to the benefit of his fellow man, he has carned the love and esteem of all who have known him, and truly can it be said the world is better for his having lived. As he has Dear Sir-Having read in the issue and esteem of all who have known him, and truly can it be said the world is better for his having lived. As he has in verity been the chief factor in the locating and development of the Dixle Copper property, it is nothing but justice that he should have the credit, Here are the facts:

In 1883 Nephi Fawcett, William Webb and Brigham Jarvis were hauling wood from the mountain near where the

interest in a lease on the Saunder's from the mountain near where the group of cluims in the West Mountain district. The lease has one year to run. The property is said to have alipped considerable ore during the past year. It is undermosed the gentiemen are about to close up a deal on the property with the Chicago owners for something like \$10,000.

The group consists of three claims located near the Old Jordan and Telegraph.

TWO NEW HOISTS.

To be Put Up at the Silver Park and El Rey.

A new hoist is to be put up at the Silver Park mine in the Tintic district.

A new hoist is to be put up at the Silver Park mine in the Tintic district.

Lake county. The ore ran \$22-10 per the group of claims of the park mine in the Tintic district.

and another is to be added to the improvements at the El Rey. Two sixty-horse-power bollers were shipped yesterday, one to go to each of the mins. The building has been completed at the El Rey and part of the plant is on the ground.

The Silver Park management is preparing for the reception of the machinery at that property, and just as soon as it is put in place vigorous development will be inaugurated, and the shift, which has reached a depth of 150 feet, will be pushed forward with all possible speed.

EUREKA IMPROVEMENTS.

Many New Buildings—Town Going Rapidly Ahead.

(Special Correspondence.)

Eureka, July 8.—People who are in the habit of visiting only the main streets of Eureka and the hoticis, or whose business alone brings them in contact with the merchants and business men, have very active, if any, idea of how wonderfully this town is growing, and how it is fast becoming a place of attractive and comfortable homes. The main street is gradually being extended east, and the character of buildings in course of evertion is protty in design, and substantial. Pairick Shea, one of Eureka's solid men, has built a roomy, well appointed store for Messra. Hefternan and Thoinpeon, and Attorney B. N. C. Stott is Just completing a stone and brick building son to be occupied by Drugglist M. D. Howlett. It makes a valuable and attractive acquisition to the main throughfare.

The building hour created by the city. The completing a stone and brick building son. The design that the city and treasurer. Both of these gendence of great pleasure to all of sauce of great pleasure to all of source of great pleasure to all of sauce of great pleasure to all of

themen are heavy normal company.

In conclusion, I desire to say that it is a source of great pleasure to all of the people of southern Utah that the prospect is so bright that the founder and promoter of the Dixie Mining & Smelting company, John Pymm, will soon reap a just reward for his labors.

JUSTITIA.

VALUABLE GROUND UNWORKED Patented Claims In Tintic That Lie In Rich Territory.

(Special Correspondence.) Eureka, July 6.—To people who ar reasonably familiar with the ground ize the unprecedented demand for likely property even though practically undeveloped, it seems to the writer strikingly singular that such claims as the Marion, James G. Blaine. Mahogany, Plutus, Medea and Jeson should at this time be permitted to remain idle. The Mahogany as shown on all maps appears to be, but is not, a part of the La Reine and just south and almost joining the Humbug. The Marior and the James G. Blaine, parallel claims, are southwest of the Godiva and Uncle San and the Plutus directly south of these two properties, runs over on Mammoth hill and laps on some of the Mammoth ground. The Jason and Medea lie just east of the Sullivan and Mount Hope claims, belonging to the Grand Central company. Surely there is no better unworked ground in Eureka. This property, comprising eighty-five acres, was located along in 1885-80 by one of the old timers, B. Christensen, who subsequently performed somewhere near 200 feet of tunnelling on the Plutus and perhaps 100 or more feet of tunneling and between forty and fifty feet of a shaft on the Medea, obtaining for all six claims a perfect government itile and patent. Some time ago the claims were bonded to the Utah Consolidated Mining company, whose properties are in close proximity to some of the claims, but as the work stipulated in the contract was not executed the bond was forfeited and from that day until the present time all of the claims have lain idle.

It is understood that Uncle Jesse Knight, like the man who didn't want the earth, only that part which "jined his", had recently made an offer was a trifle below, the figure which the owner has placed on them. It would be feasible for some one to make some sort of deal whereby they could be operated. The writer thinks (though does not know) that the title or power to control, still lies in Mr. Christensen.

ing results. I came up almost wholly for the purpose of being present during the change from the whim to steam hoist, which we accomplished yesterday afternoon, firing up, stretching the cable and hanging the bucket. I think Mr. Jennings will get the guides in today and possibly be able to commence hoisting dirt by tomorrow. I am very much interested in the outcome of the pragon from mine and want to give the property more time from this on. It is a big study—in fact this whole district is—and I want to look into a number of propositions very carefully and become familiar with conditions around Silver and Diamond."

RECORD OF A WEEK.

An Idea of What Utah Mines Are Producing.

The past week closed with a good output from the mines throughout the

From the Tintic Miner's report it as found the following mines made up the list:

Bullion-Beck, 13; Centennial-Eureka, 12; Gemini, 5; Godiva, 8; Uncle Sam and Humbug, 7; Northern Spy, 1; Sloux Con., 1; Star Consolidated, 1; Carissa, 2; Mammoth, 22; Lower Mammoth, 1; Grand Central, 22; Four Aces, 2; Swar, 23; Mammoth, 24; For Aces, 2; Swar, 25; Mammoth, 25; Four Aces, 2; Swar, 26; Marmoth mill, 3; Total, 147.

Concentrates—Bullion-Beck mill, 8; Mammoth mill, 3; Total, 11.

Bullion Bars.—Mammoth, 5.

This makes a total of 163 cars from a single camp, to say nothing of Bingham at Park City, which are perfectly capable of keeping about even in the race.

There are other districts in the state.

WILL BUILD STAMP MILL.

New Erie Officer Decides On Vigorous Operations.

(Special Correspondence.) Silver City, July 8.—The officers and directors of the New Eric Mining comdirectors of the New Eris Mining com-pany, whose properties are situated in the Columbia district, have agreed to visit the ground Monday, the 19th J. E. Hosmer, J. T. Hodson, G. S. Hayse, P. H. Tailons, Alma Eldredge and W. D. Bogan will go out in a body. The principal object in going to the district is to select a site for the stamp mill which the directory have decided to build at once. A practical millinan which the directory have decided to build at ence. A practical milliman will accompany the party and furnish estimates on different capacities of stamps to be by the showing of ores in the company's properties. Dr. J. E. Hosmer, one of the active spirits of the New Eric company, assured the writer that business has commenced in ear-mest, and that in a short time the pro-duct would be coming out of their claims.

Superintendent Schmidt Joyful Over Increase In Size and Value.

(Special Correspondence.)
Eureka, July 8.—Superintendent
Schmidt of the La Heine this morning Knight, like the man who didn't want in the earth, only that part which "lined his"n," had recently made an offer for the various claims, but was unsuccessful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was ful, owing to the fact that his offer was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the La Reine this morning informed The Herizide that was full of the Value of the have been and that since wall, mow turns out to have been and that since was full on the value of the vell and that levels as wall, now turns out to have been and that since was full on the vell and that was full of the vell and that was full of particles of the value specified as No. I was full of particles of his and values specified as No. I was full of particles of his and values of ecopy. In the control of the Simms I had three tests of this pushing a control of the Simms I had the value of every plece of rock that comes from the mine.

See the Substantian I had the propagate of the Simms I had the was a specified as No. I was full of

Silver City, July 8.—A sack of ore, said to have come from the Fissure mine, is on exhibition at Ercanbrack's store. The Fissure is located about two miles south of Diamond, just over the hill from the Old Susan. A party who informed the writer of his knowledge of the Fissure property said that the ore was uncovered about two weeks ago in a small seam, since which time it has widened into a four-foot body. The gentleman said that for some reason unknown to him, an attempt at secreecy had been made, but the

mulation of ore in their new ore house, but one can only surmise and conjecture as to what it is worth, and how much they have of it. Reports that come from the Sunbeam are more than encouraging, but Mr. Buckbee continues to preserve his conservative demeanor. His talk to your correspondent this morning was as follows: "It looks better every day, and less doubt exists in my mind than ever as to the outcome."

(Special Correspondence.)
Robinson, July 8.—David Evans returned from below last evening to give

his personal attention to the Black

a single camp, to say nothing of Bingham at Park City, which are perfectly capable of keeping about even in the race.

There are other districts in the state from which no reports have come, but, taking Tintic as a criterion, it can be seen the amount of ore extracted during a single week.

At the headquarters of the Kansas City Smeiting & Refining company, cyanide shipments were received from the Idaho Recovery company, Geyser-Marion, Overland, Mercur, Chloride Polin, Nevada Reduction company and the Silver Star, of Montana.

Doring the past week dividends were declared amounting to \$102,500, these coming from the Centennial-Eureka, Grand Central and Silver King.

of cooling summer beverages. Cups that cheer-but not inchring the summer with his cousin, Theodore Welcker, at the Hotel Mammoth.

E. D. Miller arrived from Salt Lake this morning for the Parpose of making an examination of the Star Consolidated.

D. S. Taggart of the Short Line, John Dern of the Mercur and B. F. Bauer of the Salt Lake Hardware company got off at Doremus this morning for the purpose of making an examination of the Star Consolidated.

C. H. McMehon, one of the Emerald directory, and S. M. Baricow of the Lily, the new bonanza of east Tintic, drifted in with last evening's Rio Grande.

Will Visit the Klondike.

(Special Correspondence.)
Diamond, July 8.—F. A. Druehl, who was recently elected to serve in the triple capacity of secretary, treasurer and general manager of the Klondike Mining company, is expected to reach here Sunday. It is said that Mr. Druehl will come for the purpose of determining what is best to do in the way of steam hoist equipment and pumping capacity, since the flow of water has become wholly unmanageable with whim and bucket service. The company's work is being pursued through the Jefferson claim, on which a shaft has been sunk 225 feet, and which at present has ninety feet of water. A strange thing is related concerning this same water. It seems that the Showers Consolidated and the Blue Bird folks had been anxious to obtain a sufficient supply of water to cnable them to commence operations, and they obtained was recently elected to serve in the supply of water to enable them to com-mence operations, and they obtained consent of the Klondike company to use their water, but it developed that it was so impregnated with copper as to render it useless. Some tools that had been in the shaft for some days looked as if a solution of copper had been poured over them.

Mining Near Farmington.

(Special Correspondence.) Farmington, July 8.—The Wandering Jew Mining & Milling company and Willard E. Welhe, James Olsen and Leonard Hilpert of Salt Lake, are interesting themselves in the development of the mineral deposits on the mountains east of Bountiful. They have been doing some more prospecting recently and as a result they have filed several new locations with the county recorder. Experienced prospectors are becoming more than ever convinced that rich ore will yet be found in the vicinity of Sessions' mountain, where these claims have been located. Some very good assays have been obtained from samples found there.

The county recorder today received for record wently-six notices of location for claims recently staked out on Antelope island. They all came from Don H. Porter of Salt Lake, who owns the prospects jointly with J. F. Munday, J. W. Telford and S. J. Coffiand.

Double Holiday.

ADVANCE IN JOE BOWERS

ONE OF THE FEATURES OF THE

WEEK.

The stock market during the past cek was inactive. Two days were taken up in Fourth of July demonstra-tions, and no calls were held on the exchanges until Wednesday. The leadng feature of the week was Joe Bowors. It was called at 17% cents at the opening on Wednesday and closed strong at prices above 25 cents, A big eastern order caused the sensation, which led to rumors, afterwards practically confirmed, that the pending suit over the ownership of the ground had been settled.

Alax suffered a decline but Center.

Alax suffered a decline, but Centennial-Eureka and Bullion-Beck, other old-time dividend payers of Tintle, were strong and in fairly good demand. Manmoth was beared until it sold for less than twice the amount of the last dividend. The assessment on Lower Mammoth created a decline in that stock. Sunbeam, which was assessed 6 cents a share, suffered a like fate, but towards the close of the week it regained some of its losses.

May Day, Swansea and South Swansea were well supported Mercur stocks were inactive, except Dalay, which regained some of its laste losses. La Reine of Tintle kept close to a dollar a share. Park City stocks were not so active. Daly showed advances, while Anchorwas in demand. Ontarlo and Silver King made no changes.

During the week the stock exchanges made the following saless. Ajax suffered a decline, but Centen-
